

Model SC-150

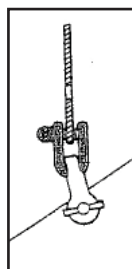

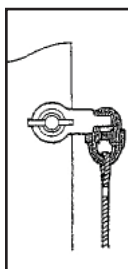

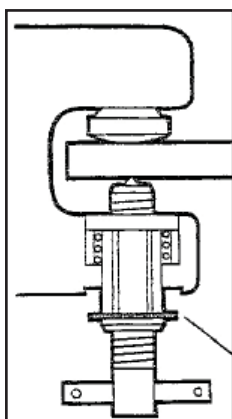

Model

SC-150

Screw clamp
Optional liftingstrap

Modell SC-150 clamp suitable for plates or any other flat objects from 6-28 mm. Optional usage with liftingstraps for lifting or steering the lifting load.
SWL 150 kg in any direction.

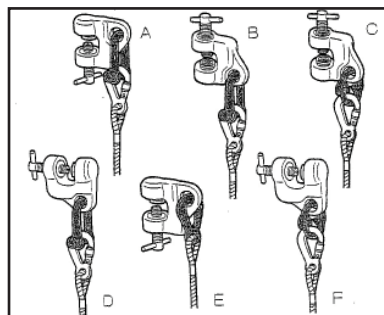

How to use the lifting clamp:

Code No.	W.L.L. (tons)	Jaw opening (mm)	Weight (kg)
	Safety factor 10 times SC		
28710280	0.15	6 ~ 28	0.7

FEATURES

- Main body made of light and strong super duraluminium
- Working temp -20°C to +150°C
- International patents, spherical swivel-jaw type. Objects are clamped securely with a swivel jaw.
- Double safety in construction; screw type vise and an automatic clamping mechanism.
- With a spring type pressure nut (tensioning device)
- The clamp screw and spherical swivel jaw are induction-hardened.
- Easy to attach and detach by the use of a patented spring collar
- Smooth surface by alumite processing

APPLICATIONS

Lifting • transportation • turning over • rotation • welding • assembly • erection • loading • press working • bending • lifting pieces • pulling pieces • optional liftingstrap for steering / lifting the load

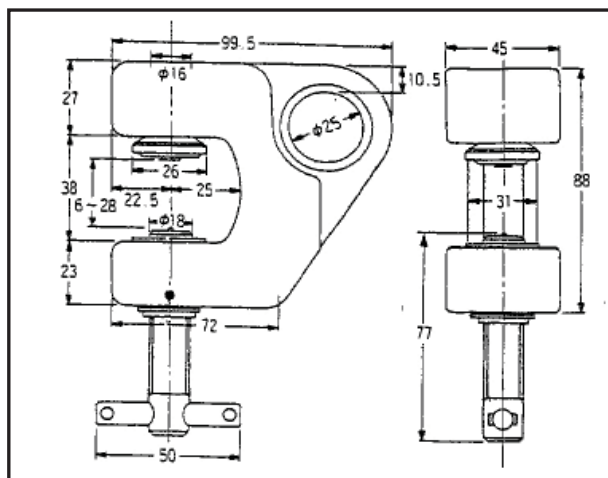

MATERIAL TYPES

Steel plates • flat steel • steel beams • steelworks • bridge beams • steel structures • steel frames • steel sheet piles • crane beams • columns • end plates • shipbuilding transverse members.
